INDUSTRY 4.0

4^a INDUSTRIAL REVOLUTION

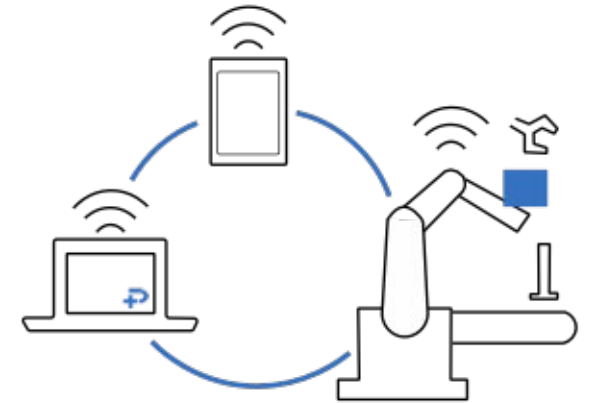

DIGITIZATION OF PROCESSES

DEEP INNOVATION OF PRODUCTION PROCESSES

Più Sviluppo plays a role as a Hub to support the digital transformation of a production System.

Our model is based on the paradigm of Doing to gather all the skills for the development of innovation project just when needed

QUICK CONNEX

INTERCONNECTION SOLUTIONS

Development simple and intuitive solution for machine to machine or machine to ERP connection. 100% Industry 4.0 compliant

- Input to machine: part programs / parameters
- Output from machine: data / aggregate data
- Connection to logist / warehouse system
- Dashboard for data analys

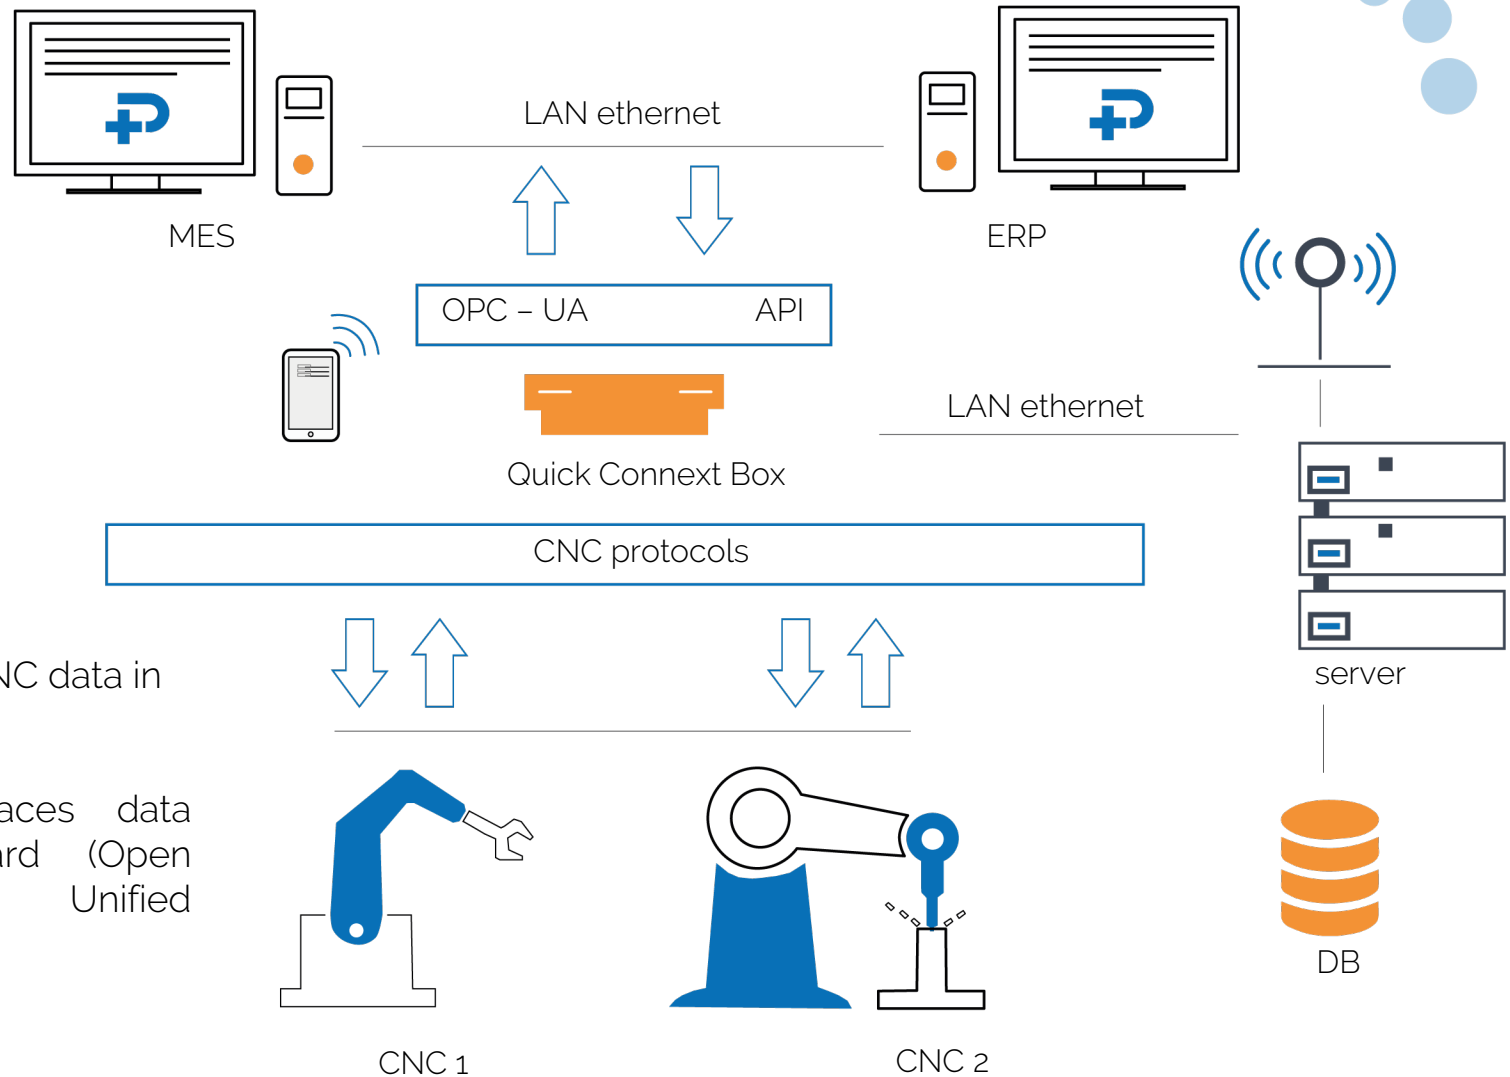

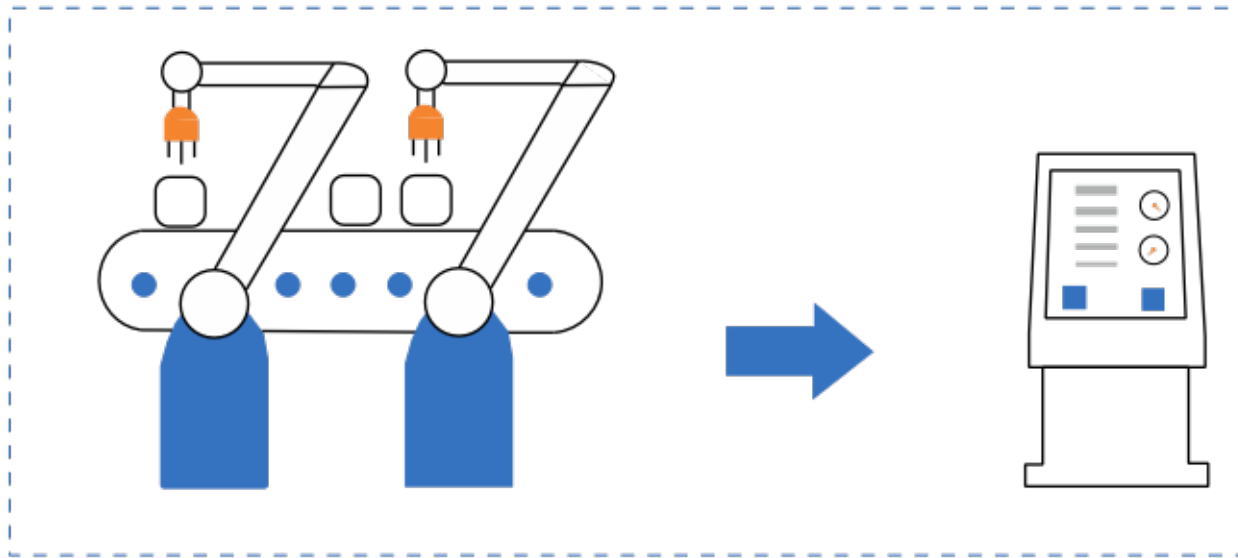

QUICK CONNEXT

Normalizer converter PLC / CNC data in to standard format.

Quick Connect Box interfaces data through OPC-UA standard (Open Platform Communications Unified Architecture) and API

- Simple integration with machines and installations
- interaction with the management and logistics systems of the factory

HUMAN – MACHINE – INTERFACE

HMI

DEVELOPMENT

INTERFACE **SYSTEM**

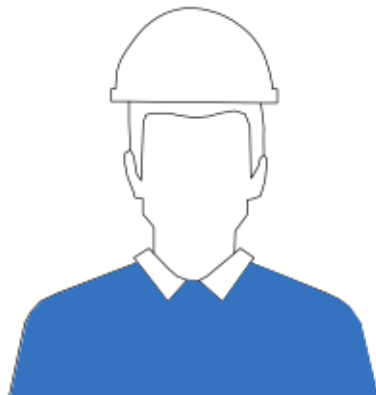

Our goal: simplifying process and operations factory using human-intuitive interfaces systems

Our focus: process and operator. For this reason our interfaces are advanced and simple at same time.

DASHBOARD AND DATA

PROCESS-DATA-ANALYSIS

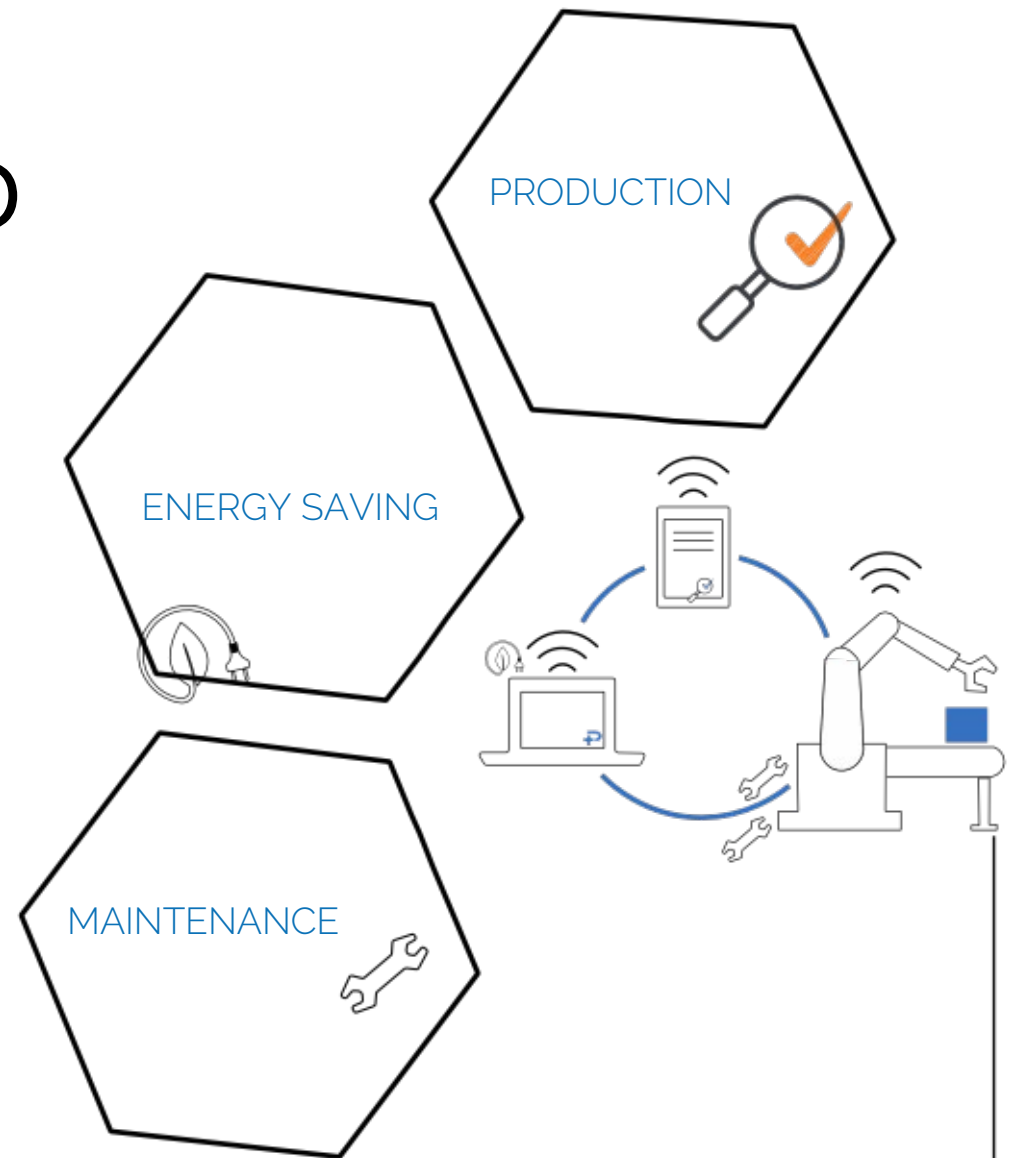

Our goal: use useful data. We adopt a process-oriented approach about data a process-oriented approach of the useful data during the process control

Our way: develop dedicated dashboards and control panels for the remote management / monitoring.
